**Subject:** Support For the Microsoft Settlement

Dear Sirs:

This is to express support for final acceptance of the settlement between Microsoft, the Department of Justice, and the nine states. We urge you not to reject this settlement as any delays will not serve the interests of the American people but serve to further the causes of Microsoft's competitors who continue to choose to compete in the courts instead of the marketplace.

The American people are insulted by claims that we have been harmed by Microsoft. In truth, we have been harmed by their competitors who have stalled progress in technology and in the economy. These suits must not be allowed to continue.

Before said suits, our country experienced unparalleled growth and prosperity. Our country regained its dominance in technology due to the innovation and growth of Microsoft and the many companies supporting their operating systems.

We respectfully urge you to help return our country towards prosperity by rejecting further lawsuits and further delays in acceptance of the anti-trust settlement.

Edward J. Barsano, CEO
